Summary

Versatile Front-End Developer focused on engineering and delivering user centric web interfaces leveraging Next JS, React, TypeScript, HTML5, CSS3/Styled components and JavaScript. I thrive working in a collaborative agile environment and I am hands on with supporting design and developments teams to consistently deliver high quality features.

Technical Skills

Languages: HTML5 | CSS3 (+ SCSS, BEM) | JavaScript ES6+ | Typescript
Frameworks: React (+ hooks) | Next.js | Material-UI | Redux
Technology: NPM | Git | Yarn | React dev tools | Firebase v9 | Sanity |GitHub

Experience

Frontend Developer Internship | Certificate   Jun 2022 - Current
Frontend Simplified

- Transformed a completely static HTML, CSS, JavaScript and React single page application into an interactive user interface using animations, transitions, and carousels.
- Processed API requests with Axios to dynamically represent product data from a cloud server and represented it through skeleton loading states, pagination, and dynamic routing.
- Utilized Git version control and the GitHub interface to work and thrive in a virtual and collaborative team environment.

Freelance Frontend Developer   May 2022 - Current
Self Employed

- Delivered professional websites using **HTML5**, CSS3 (+ SCSS, BEM), **JavaScript** and **React** best practises.
- Improved website performance by compressing caching and **lazy loading** images and components.
- Included SEO, **responsive**, multi-platform and hosting support, enabling their website to be used by any browser or device in the world.

Projects

Ecommerce Website | Website | GitHub
- Created a fully responsive clothing brand website with **Next JS, Typescript, Tailwind CSS, Redux and Sanity**. This website is based on a minimalistic design with intuitive navigation and a focus on delivering a seamless user experience.

Apple Redesign | Website | GitHub
- Redesigned the Apple website with Next JS, Typescript, Redux, Tailwind CSS and Sanity. Consists of Add to Basket, animations, authentication, and checkout features. Utilised Stripe to setup checkout aspect.

NFT Marketplace | Website | GitHub
- This project was part of my online **internship** with Frontend Simplified where I transformed a static website to be dynamic and fetched data from APIs using **axios**. The website is completely responsive with animations and filters to enhance user experience.

Online Library | Website |
- Utilised React, JavaScript, HTML and CSS to build an online library. This is a responsive website capable of being used on multiple devices with skeleton loading states and filters to improve user-friendliness. The data is also fetched from an API using axios.
